Mr. Charles E. Bolling, Superintendent of the City Water Works, has completed his annual report concerning the work done by the department during the year ending December 31, 1893. The report, which is the ninth in its order, contains among other things the following interest-

The total appropriation at the disposal of the department for the year was \$6,sale, of which the sum of \$56,821.25 was ursed, \$46,318.03 for actual expenses of menance, and \$10,502.22 for betterment in laying pipe and making taps. During the year 11,622 lineal feet of water pipe are laid, 28 fire hydrants set, and 709 taps ass laid, 28 fire hydrants set, and 709 tags made. Besides, all the nozzles of the fire hydrants in the city, to the number of 516, were changed, increasing the size of the discharge nozzles to 2.1-2 inches, this change cost \$1,071.21, and conforms our fire hydrants to the usual standard are in use in nearly all the large cities in the United States.

he total receipts of the department the year amounted to \$145.898.34. This does not include the value of water mm does not include the value of water used by the city in her various departing is, nor that given to churches, charitable institutions and indigent families. A low estimate of this value would be 1000, so that our gross revenue should be computed at \$178,888.34. Deducting the actual expenses of maintenance from the amount received shows a net revenue of 1000 and 1000 mount of \$55,000, would make a revenue similate. Owing to the large number people out of work, and the extreme people out of work, and the extreme planes in business, a large number of digent families have been supplied with mer free, in accordance with the probable of the city ordinance. There are we also families getting water free. It will be observed that the expenses to the city of the

the department are larger than they ere last year. This is due to the fact were last year. This is due to the fact that the expense of pumping water was greatly increased during the extreme cold weather lasting for two months last winter, and requiring the use of our city force and some extra men, day and might, at the pump-house clearing away the ice, and catalling some expensive relative to the machinery. Also, by the masual expense of having to run the seam pump almost continuously for two months last winter at a cost of about to per day.

THE FINANCIAL CONDITION. The following table shows in full the appropriations and disbursements during by administration for the past nine cars, or from January 1, 1885, to January

Year.	Receipts.	Approp'n
SS	\$ 58,632 45 104,505 90 111,024 17 116,956 61 114,096 87 136,111 31 134,857 49 141,811 03 143,898 34	51,691

above table no credit is made edupartments and charitable After the year 1886 the New Park was transferred to the ned Buildings account. The folworks on January 1, 1894, of \$480,377.84.

## IMPROVEMENTS OF THE WORKS.

Base-Bal This Aftersoon.
There will be a match game of baseball this afternoon at Island Park between
the park and roads near the New Reservoir ware charged against the Water
Works, amounting, approximately, to
face All the land around the reservoir
and from the reservoir to the river was
purchased out of the Water Works appropriation, the value of which may be
estimated at \$200,000. Deducting these
amounts from the present balance against
the works—for they are in no way chargestile to the Water Works construction—
would make the true balance chargeable
to the Water Works \$200,000. Whatever interest is chargeable on account of bonds
issued or money appropriated, has at
all times been more than offset by the
actual value of the water consumed by
the city for her various uses, for which
no credit has ever been made. I have
stated the above at some length to show
plainly the financial condition of this
most valuable property of the city, and on
account of its good showing to urge that
than heeded appropriations be made to
being the Water Works to a state of effidency which is greatly needed, and which
harge number of our water takers detand, as they are now subjected to great out of the amount expended in the past harge number of our water takers de-and, as they are now subjected to great anoyance and inconvenience on account

No large appropriation has been made since the completion of the new pump works in 1883. The time has come when something must be done. In evidence of now rapidly the demand for water has mbled since September, 1863, and the Water Works were commenced in October, 1830. The large increase of consumers, and attendant thereon large increase of waste, has doubled the daily demand, and it is necessary that we should need this demand. In the past few months have had the pressure taken at every respling in the city, and compared the ressure with that taken a few years so. I find that the pressure on the lower ryde, supplied from Marshall reservior, as decreased very little. This is due to be fact that the topographical variation f this service is slight, and that there are not been a large number of taps ande on this service, for it supplies that ortion of the city already built up. The crease of taps in this service is mainly

THE PERSURE NOT SUFFICIENT. On the high service supplied by a thirty-inch main from the New Reservoir, I tipate that we have made 5,000 taps in lee last ten years, and as this section the city varies greatly in its topo-raphy, having as great differences in titude as 165 feet. It is natural that the pressure of the various high points should have fallen off. Especially is this the case at the following high points: Albemarie and Pine streets, decrease in pres-sure, 50 per cent.; Broad street from Shafer to Ninth street, decrease, 39 per test (average); Franklin and Adams streets and Grace and Adams streets, decrease, 25 per cent; Main and Second streets, 39 per cent; Marshall and Eighth streets, 69 per cent. The pressure at the last-named place is only six pounds, and water often fails to reach the fixtures on the second floor of the houses. The residents in these locations are great sufferers for want of water, and have time and time again petitioned the Council for re-lief. The laying of a larger main in the streets at these points would afford no relief. I still recommend the general in-troduction of water-metres, for I believe the stoppage of the waste at the lower points would afford all the relief needed for some years, and regard this plan as

THE CITY WATER SUPPLY

AN INTERESTING STATEMENT BY
SUPPRINTENDENT BOLLING.

Some of the Statements Contained in His
Ninth Annual Report. The Supply Does
not Correspond with the Demand.

The city and the water taker. It seems, however, that our Council is opposed to the general introduction of the water-metre, and this being the case, there is nothing else left but to lay larger mains leading to the reservoir and build additional pumps. No time more propitious than now could be selected. Water pipe and machinery was never sold at as low prices, and the city, in my opinion, would save a large sum of money by doing this work at once.

Our present pumping machinery is of insufficient capacity to meet these rapidly-increasing demands. How narrowly we escaped serious trouble and danger last winter few now consider. For days and days the water drawn from the reservoirs last winter averaged 17,000,000 gallons, and for days we could only pump 13,000,000 gallons. The reservoirs were nearly empty, and it got to that point that it was almost necessary to shut the water off the city and hold the small amount remaining in the reservoirs for fire extinguishment.

This is a most grave and serious condition, and we should run no such PUMPING CAPACITY TOO SMALL.

dition, and we should run no such chances again. The terrible conflagrachances again. The terrible conflagrations which have almost wiped out other cities and entailed such great loss should serve as a warning. What is our present status? We have a maximum pumping capacity of 21,000,000 gallons per day, dependent upon the old pump-house for 6,000,000 gailons of this, and deprived of this when the river is very high or low, and for days last winter, when we were in greatest need, we did not get 2,000,000 gallons per day from these pumps.

Our average daily consumption for the year was 13,521,256 gallons, and at one time last winter the average was 17,860,130 gallons per day. There is no branch of our city which more seriously demands protection; none in which our people are more interested in preserving in a good and capable condition, and no property owned by the city, from the returns made each year, is more entitled to have money spent upon it to

titled to have money spent upon it to keep it up to the very highest state of

## MOZARI SYMPHONY CLUB.

### Another Star Cour .- Entertainment to be

Given at be As ociation Building. Another concert of the Star Course Entertainments will be given in the big hall of the Young Men's Christian Associaof the Young Men's Christian Associa-tion next Thursday evening, April 12th. Members of the Star Course may secure reserved seats at the association building after Tuesday morning at 10:30 o'clock. The New York Mozert Symphony Club, one of the leading concert organizations of the country, will on that occasion execute an attractive programme. The ciub is under the direction of Messrs. M. Blodeck and Richard Stoelzer, and is M. Blodeck and Richard Stoeizer, and is composed as follows: Miss Cecilia Braems, prima donna soprano; Mr. Theeder Hoch, cornet virtuose and violinist; Mr. Alberto C. Mora, basso profundo and flutist; Mr. R. Stoeizer, viola d'amour soloist; Mr. Mario Blodeck, viol da gamba solo-ist and violencellist; Mr. Otto Lund, violin

viola d'amour and its construction, a de-scription of its qualities will be of inter-est. It has fourteen strings, similar to the viola in theory, but far more expres-sive in power of tone. When listening to sive in power of tone. When listening to it a person at times gets the impression of a complete orchestral ensemble. Some of the strings on it are used in bowing, while the balance are directly under the original seven, and vibrate in unison. The tone must be heard to be superior to the violoncello in tone. It is the largest instrument held under the chin. Herr Stoelzer is the only soloist before the public at present who plays this instrument.

The viol of graphs is a raise instrument which was invented in the Seventeenth century by an English prisoner, who was granted life and freedom as reward for his work. It has six strings, and is a reward for his work. It has six strings, and is between a violoncello and a viola amount disbursed the commencement of the works.

## Base-Bal This Afternoon,

People are rather slow in exchanging their old State bonds for the new cen-tury bonds. Under the act passed by the Legislature during the last session the Board of Sinking Fund Commissioners is authorized to refund the still outstanding bonds, which are estimated to amount to about \$2,600,000. Up to the present time only about \$600,000 worth nds have been presented to the

board.

The time for the refunding has been imited by the law until July 1, 1894, or it may in the discretion of the board be still further extended, not exceeding six

Rev. Edward L. Pell will deliver his regular weekly lecture on the Sunday-school lesson at the Young Men's Christian Association this afternoon at 5 c'clock. All are invited.

sands of homes-it has been for nearly a quarter of a century a standard medicine for enriching the blood-it absolutely cures dyspepsia—it gives a hearty appetite—increased diges-tion—it cures all forms of kidney and liver complaints-it gives renewed energy and is a specific for gener. debility-it keeps off chills and fevers-it checks malaria-it is a boon to debilitated men and womenit is pleasant to take and won't in-Jure the teeth. But get the genuine. Brown Chemical Co. Battimore, Md.

## FINANCE AND COMMERCE

THE CLOSING QUOTATIONS OF MONEY.

Offerings and Sales at the Richmord Tobacco Exchange-Internal Revenue Collections-Fereign Advic.

NEW YORK, April 6.—The dealings at the Stock Exchange to-day were character.zed by marked strength, without, however, any material increase in the volume of transactions, the sales aggregating 214,000 shares, against Distilling and Cattle Feeding at the opening on the strength of the developments in regard to the quo warranto proceedings, and the stock declined 1½ to 24½. The attack was undoubtedly intended to influence the general market, but the buying power was such as to more than counterbalance the scales for the short account, and a recovery set in, which gradually extended to the entire Rallway and Industrial shares. The strength of the London market and the receipt of foreign buying orders stimulated the upward movement. The local pools were more aggressive than for some time, and bought all classes of stocks freely, doubtless because they are able to secure all the money needed at merely nominal rates of interest. Speculation was affected to some extent by reports from Washington that the Wison bill may be defeated, although the advices as yet are too vague to be accepted as a criterion of the real sentiment of the Senate. The advance was equal to ½62 per cent. Sugar, Distillers, Lead, the Grangers, Minneapolis and St. Louis, American Tobacco, and Edison Illuminating scoring the greatest improvement. The great centre of attraction in the late transactions was Rock Island, which moved up suddenly from 70% to 724, on reports that the differences between the company and the Minneapolis and St. Louis had been adjusted. From trustworthy sources it is learned that the Rock Island management will insist upon the payment of the indebtedness due from the Minneapolis and St. Louis had been adjusted. From trustworthy sources it is learned that the Rock Island management will insist upon the payment of the indebtedness due from the Minneapolis and St. Louis dollar for dollar, and that any other proposition from the latter will be rejected. The market closed strong at or near the best figures of line day. The day's

day aggregated 108,000 shares; unitsted, 45,313 shares.

Money on call easy at 1 per cent., last loan at 1 per cent., and closing offered at 1 per cent.; prime mercantile paper, 31,244 per cent.; prime mercantile paper, 31,244 per cent.; bar silver, 61%. Sterling exchange is firm, with actual business in bankers bills at 481,2481,4 for sixty days and 488,436,4881,5 for demand; posted rates, 488,6480,5; commercial bills, 488,2484,488 for extra days and 4874,6488 for demand. Government bonds strong. State bonds easier. Railroad bonds active and easier. Silver at the board dull.

Treasury Balances—Coin, \$105,077,000; currency, \$50,526,000.

contradictions on the part of those whose remoteness from the cotton field gives them, of course, unusual sources of information. But somebody must be believed, and whether it shall be the people who live in the cities or those who live on plantations will have to be decided by the cotton world generally. The advance in wheat from the lowest point touched during the past two months is equivalent to 50 points in cotton, and yet there are million after million of bushels of wheat, but every day it is approximately known what the amount of cotton is, and once a week it is known to a bale, and at this time of the season the size of the crop can be arrived at within at least 100,000 bales, which approximate suessing cannot be had of any other speculative commodity in the world. Liverpool was disappointing to-day, closing 1 point lower than yesterday, notwithstanding the improvement of 4 to 5 points yesterday. Our market opened very well, but declined to very near the lowest point of yesterday, and again improved.

CHICAGO.

gain over yesterday. The range of prices was a little wider than of late, May selling between 39%c. and 38%c38%c., closing at 38%g338c.

Oats—This market was assisted to a strong undertone by the Missouri report.

Oats—This market was assisted to a strong undertone by the Missouri report. The strength in wheat helped also, but shortly before the end there was a softening of prices, so that instead of a gain, there was a loss of ½c, in May at the close.

Provisions were not as active nor as firm as they have been recently. The element of to-day's weakness lay in the selling of pork and ribs by packers. There was a disposition to force prices down shown by local traders. Neither the hog market nor the strength of wheat had any effect. The close showed a loss of 20c. from yesterday for May pork, 2½c, for May lard, and 5c, for May ribs.
